#### From the INTERNATIONAL SEARCHING AUTHORITY

To: W.P. THOMPSON & CO. Coopers Building Church Street Liverpool L1 3AB UNITED KINGDOM

NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL SEARCH REPORT AND THE WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY, OR THE DECLARATION

	(PCT Rule 44.1)
	Date of mailing (day/month/year) 13/09/2004
Applicant's or agent's file reference	
RJB/P470039WO	FOR FURTHER ACTION See paragraphs 1 and 4 below
International application No.	International filing date
PCT/GB2004/002348	(day/month/year) 03/06/2004
Applicant -	
TOROTRAK (DEVELOPMENT) LIMITED	PESPONSE DUE: 13.11.04

1.	x	The applicant is hereby notified that the international search report and the written opinion of the International Searching Authority have been established and are transmitted herewith.
	4	Filing of amendments and statement under Article 19:  The applicant is entitled, if he so wishes, to amend the claims of the International Application (see Rule 46):  When? The time limit for filing such amendments is normally 2 months from the date of transmittal of the International Search Report; however, for more details, see the notes on the accompanying sheet.
		Where? Directly to the International Bureau of WIPO, 34 chemin des Colombettes 1211 Geneva 20, Switzerland, Fascimile No.: (41–22) 740.14.35
		For more detailed instructions, see the notes on the accompanying sheet.
2.		The applicant is hereby notified that no international search report will be established and that the declaration under Article 17(2)(a) to that effect and the written opinion of the International Searching Authority are transmitted herewith.
3.		With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:
		the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices.  no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.
4.	Rem	inders
	applic	tly after the expiration of <b>18 months</b> from the priority date, the international application will be published by the national Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international cation, or of the priority claim, must reach the International Bureau as provided in Rules 90 <i>bis</i> .1 and 90 <i>bis</i> .3, respectively, e the completion of the technical preparations for international publication.
	intern	applicant may submit comments on an informal basis on the written opinion of the International Searching Authority to the national Bureau. The International Bureau will send a copy of such comments to all designated Offices unless an national preliminary examination report has been or is to be established. These comments would also be made available to ublic but not before the expiration of 30 months from the priority date.
	date (	n 19 months from the priority date, but only in respect of some designated Offices, a demand for international preliminary ination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority (in some Offices even later); otherwise, the applicant must, within 20 months from the priority date, perform the prescribed or entry into the national phase before those designated Offices.
	In res	spect of other designated Offices, the time limit of <b>30 months</b> (or later) will apply even if no demand is filed within 19

See the Annex to Form PCT/IB/301 and, for details about the applicable time limits, Office by Office, see the *PCT Applicant's Guide*, Volume II, National Chapters and the WIPO Internet site.

#### NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

### INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international polication. Furthermore, it should be emphasized that provisional protection is available in some States only.

#### What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

#### When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

#### Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been its filed, see below.

#### How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

#### What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

Notes to Form PCT/ISA/220 (first sheet) (January 1994)

#### NOTES TO FORM PCT/ISA/220 (continued)

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new:
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

### The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
   "Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
- [Where originally there were 15 claims and after amendment of all claims there are 11]:
   "Claims 1 to 15 replaced by amended claims 1 to 11."
- 3. [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
  "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]: "Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

#### "Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

#### it must be in the language in which the international appplication is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

#### Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

#### Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

Notes to Form PCT/ISA/220 (second sheet) (January 1994)

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/GB2004/002348

_	Pas	· No. II	Driority							
Box No. II Priority										
1.	. 🗵 The following document has not been furnished:									
		$\boxtimes$	copy of the earlier ap	plicatio	on whose pri	ority has been claimed (Rule 43bis.1 and 66.7(a)).				
			translation of the earl	ier app	lication who	se priority has been claimed (Rule 43 <i>bis</i> .1 and 66.7(b)).				
	Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.									
2.		This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43 <i>bis</i> .1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.								
3.	Add	Additional observations, if necessary:								
			•							
	Box No. V Reasoned statement under Rule 43 bis 1(a)(i) with regard to povelty, inventive stop or									
	Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### Re Item V.

The following documents are referred to in this communication:

D1: EP 1 013 523 A (TOYOTA MOTOR CO LTD) 28 June 2000 (2000-06-28)

D2: EP 1 085 312 A (AVL LIST GMBH) 21 March 2001 (2001-03-21)

D3: WO 99/46604 A (BOSCH GMBH ROBERT; HECKMANN HANS (DE);

WINNER HERMANN (DE)) 16 September 1999 (1999-09-16)

D4: DE 43 28 893 A (HITACHI LTD) 10 March 1994 (1994-03-10)

#### 1. Clarity

1.1 The application does not meet the requirements of Article 6 PCT, because claims 1,3,7,8,10 are not clear.

Claims 1,3,8,10 distinguish the two acceleration signals as being obtained by measurement and being obtained "based upon net driving force". This gives the impression, that the net driving force is obtained without measurement and it is not clear where said force is known from. Furthermore it is not clear, what the vague expression based upon means.

- 1.2 Claims 1,8 refer to a method / a device for determining acceleration of a motor vehicle. This designation gives the impression, that a general method/device is disclosed, for measuring vehicle acceleration in all directions and for all purposes (e.g. slip control, traction control, suspension control, crash detection,...). The description however discloses only the determination of a longitudinal acceleration in the context of vehicle powertrain control. Therefore, the actual independent claims are too broad and are therefore not supported by the description as required by Article 6 PCT.
- 1.3 Claims 1,8 further leave it open which of the signals is high pass filtered and which of the signals is low pass filtered. The claims therefore **lack the essential feature** (see description: page 1, paragraphs 2-4 and page 4, paragraph 2) that it is the *time lag introduced by the low pass filtered acceleration sensor signal*, that needs to be corrected by addition of a high pass filtered transmission/brake force based acceleration signal.

Without these features the adding of two respectively filtered acceleration signals would only consist of the juxtaposition of well known elements which would not be inventive. The claims are thus not clear.

International application No.

PCT/GB2004/002348

- 1.4 The method of *high pass filtering* of dependent claim 7 is not clear and also lacks support by the description.
- 1.5 Some of the features (...adding the two filtered acceleration signals..) in the apparatus claim 8 relate to the category method rather than clearly defining the apparatus in terms of structural features. The claim thus lacks clarity (Article 6 PCT).

#### 2 Novelty / Inventive step

An opinion on novelty and inventive step can only provisionally be given, as far as the claims can be interpreted regarding the above mentioned lack of clarity.

- 2.1 Document D1 (see paragraphs [0040],[0041],[0051],[0055],[0056]), which is considered to represent the most relevant state of the art, discloses (the references in parenthesis applying to this document) a method of determining acceleration of a motor vehicle, said method comprising:
- obtaining a low pass filtered acceleration signal (figure 5, step 151) by measurement,
- obtaining a further acceleration signal based upon net driving force.

From this, the subject-matter of independent claim 1 differs in that:

the two filtered acceleration signals are added.

The subject-matter of claim 1 is therefore novel (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as:

To provide an acceleration signal as input signal for a vehicle power train, which signal having improved low frequency noise and time lag properties.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons: Document D1 uses the driving force related acceleration signal only to judge **normal functioning** of an acceleration sensor. It does not mention a time lag of the sensor being a problem for its (brake) control purposes. It does not mention a correction of the sensor signal by adding a signal derived from net driving force. It does not mention the use of the acceleration signal as input signal for a vehicle power train.

It appears not obvious for the skilled person, to use a signal based on so many model assumptions as the net drive force to correct a sensor signal for which well established

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/GB2004/002348

precise sensors are available.

D2 and D3 (see passages as cited in the search report) make use of added low pass and high pass filtered acceleration signals, but in other contexts and for other purposes. As far as can be said regarding the above mentioned lack of clarity, these documents also do not appear to prejudice novelty or inventive step of clarified claims.

- 2.2 Apparatus claim 8 as comprising the apparatus features corresponding to the method features of new and inventive claim 1 is also considered to be new and inventive.
- 2.3 Claims 2-7 resp. claims 9,10 are dependent on claims 1 resp. 8 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

#### 3 Industrial applicability

The claimed invention meets the requirement of industrial applicability of Article 33 (4) PCT.
